PROJECTS

Smart Farming with Machine Learning

January 2024 - April 2024

- Utilized satellite and IoT sensor data for precision agriculture, optimizing irrigation and fertilizer use.
- Built a real-time dashboard for farmers using Python, Flask, and Power BI for better decision-making.
Integrated cloud-based storage and processing (AWS/GCP) for scalable farm data management.
- Implemented computer vision techniques for plant disease detection using CNNs, improving early diagnosis and yield efficiency.

Movie Seat Booking System <https://seatbooking-uspx.vercel.app/>

- Built a responsive theatre seat booking interface using HTML, CSS, and JavaScript.
- Implemented interactive seat selection with real-time visual updates.
- Styled layouts with CSS for clear row-column mapping and enhanced UX.
- Added booking confirmation logic with seat availability tracking.

INTERNSHIPS

- Networking Cloud Virtual Internship**

Completed virtual internship focused on networking concepts and cloud technologies.

CERTIFICATIONS

- Attained AWS Cloud certification – AWS Academy.
- Data Analytic Process Automation – Alteryx Sparked.

ACHIEVMENTS

- Team Lead for successful project delivery.
- Led community service in three villages.
- Active kabaddi sports player.
- Storyline script creator.
